

Monsoon

The ultimate swim spa system

Our swim spas and Exercise Pools are fully perimeter insulated by our unique "Tri-Insulation System" utilizing a Tri-Layered approach to maximize insulation and minimizing running cost. The cast acrylic shell is covered entirely with a layer of closed cell structural foam which offers total insulation and added structural reinforcement to the superior steel frame.

The swim jets are driven by two Badu 4hp pumps. The Badu jet streams are each adjustable for speed and pressure to reduce the surface turbulence, and can be positioned to provide buoyancy and control to the swimmer. Each Badu jet is using its own pump pushing 1100 liters per minute thru 80mm pipe to give arguably the most powerful swim spa experience available, out performing most on the market.

Dimensions

Water capacity	6400 Litres
Dry Weight	900kg
Dimension	4780 x 2260 x 1260mm
Adults	5 adult seats inc. lounge
Required power	220V - 32amps

Equipment

Control system Spanet XS-4000
Heater 4500 watts Teflon coated
Pump flow system 2 x Badu 4hp, 2 x 3hp pumps
Total water flow 14hp
24hr circulation pump QuiteFLO 1.8amp 430watts
Swim power plant Twin Badu JetStream 2200lts/min

Jets 77

Micro pulse hydro jets 39
Mini pulse hydro jets 21
Maestro pulse hydro jets 3
Mini storm leg jets 12

Features

Captains therapy seat with neck jets
Comfort-Mould soft head rests
Cascading water fall
Spectrum underwater mood lighting
Spectrum led surround perimeter lighting
Electronic freeze protection system
Zox ZX300 Corona discharge ozone system water purification
LCD topside programmable control panel
Cabinet perimeter "Tri-Insulation Technology"
4 way ease fold insulating cover with security locks
Removable access panels
Anti-corrosion galvanized coated steel frame

Options

Cedar yacht steps
4 way cover lifter
Hi-Fi Music Systems: Executive Version: MP3 waterproof docking station with tuner
Floating remote control
Elite Version: MP3 solid state amplifier with manual remote
